Fri, 28 Dec 2018 12:08:00 GMT arc welding circuit diagram pdf - Gas metal arc welding (GMAW), sometimes referred to by its subtypes metal inert gas (MIG) welding or metal active gas (MAG) welding, is a welding process in which an electric arc forms between a consumable wire electrode and the workpiece metal(s), which heats the workpiece metal(s), causing them to melt and join. Along with the wire electrode, a shielding gas feeds through the welding gun ... The less steep curve starts from the minimum OCV.. It should be remarked that the

no-load or Open Circuit Voltage is always much higher than the actual voltage drop across the arc.. The dark area represents the change in current consequent to a change in voltage on the steep curve.
